Here is my submission on the puppy farm issue.

I object to early sterilization of all young dogs. Early sterilization has many health problems for the dogs involved.

I am a member of DogsWest and also the German Shepherd Dog Association. Both organizations have strict guide lines for breeding and impose penalties for members who do not follow them.

So how is sterilizing registered dogs going to stop puppy farming? These dogs and their owners are not the problem.

The problem is the UNREGISTERED dogs and their owners.

Also I object to any puppies being sold in pet shops.
