Stop Puppy Farming
Department of Local Government, Sport and Cultural Industries
PO Box 8349
PERTH BUSINESS CENTRE WA 6849

Dear Sir or Madam

The debate has been framed on the supply of puppies without examining the demand for dogs.

Dog regulation has to be two sided, one is demand and one is supply.

Everything I have seen is based on supply, nothing about demand for dogs.

We want the best homes for puppies.

Reduce the demand for dogs by eliminating impulse buying and people buying dogs without the means to support them.

Puppy farming has been a commercial response to high prices paid for "cute" puppies and impulse purchase of puppies enabling anyone, at any time, being able to buy puppy farmed puppies.

SUPPLY OF DOGS

The two dog rule was designed the stop "backyard breeding" but it doesn't work because bigger establishments which provide most of the farmed puppies are outside of the two dog rule. Puppies bred only for profit is puppy farming.

These businesses have money and resources and will be able to work out ways of circumventing the types of changes being discussed, so demand for dogs and suitability of owners must be addressed too.

The term "backyard breeding" seeks to vilify people who breed in their home as well as the minority of miscreants who breed in substandard backyard accommodation.

I bred one litter in 1982, the puppies were born to a treasured house dog in a spare bedroom in the house. In her comfort zone. Nothing sub-standard, same room a baby went into later. Didn't need or want a purpose built kennel. Didn't need to have it inspected.

There is rumor that new rules will be introduced and to be a "breeder" you will be required to have brick built kennels on 5 acres or more. Only genuine commercial puppy farmers will be able to afford that type of business and any moves in that direction will institutionalize puppy farmers rather than reduce them.

It is also rumored that no "breeders" will be allowed in the metropolitan area because the councils will simply refuse to consider them. This will again only help puppy farmers.

In this context I understand from the information "progressed" at the Dogs West meeting, that anyone with a complete animal will be taxed as a breeder, in addition to already substantial registration fees.

Ownership of a complete dog and breeding are not the same thing.

I have had complete bitches since 1979 and bred one litter only (registered pedigree puppies). My hobbies are dog related, I show my dogs when they are young and then do obedience, agility etc when they are older.

To show I require a complete bitch. Whilst I desex my bitches when they are older, for health reasons, it ruins their coats and makes their coats much harder to care for. Ask any pet owner of my breed.

Ownership of a complete dog or bitch does not make one a breeder. Ownership of a complete dog already attracts significant registration fees.

Most pet owners desex their pet dogs, any mandatory age that is before maturity affects the development of breed characteristics and physical development.

DEMAND FOR DOGS

Dog ownership should not be an impulse decision, but should be limited to people who have somewhere suitable to keep a dog and a long term commitment to caring for the dog.

I have bought pedigree dogs from the same breeder for nearly 40 years and on only one occasion has a dog been immediately available when we “needed a new dog” due to passing of the previous dog.

You plan for and wait for your dog or puppy.

If you want a dog, it is for 7 -15 years and you should not make that sort of commitment without consideration or in a rush. You may recall that many years ago a campaign was run by RSCPA or similar “A puppy is for Life”.

How to reduce demand?

1 - Educate buyers so they can make more informed decisions

- Make them aware it is a life time commitment, “Puppy is for life” that is usually between 7 and 15 years.
- Never buy from a puppy farmer, so if the bitch is not with her puppies, assume it is a puppy farmer and do not buy.
- All puppies must be microchipped before you can buy them and they come with paperwork showing the microchip details and showing where the buyer details have been inserted on purchase.
- Cross bred does not guarantee healthy.
- Puppy farmers do no genetic testing or breed related testing (eg hips).

2. – Make buyers realize they must be a suitable home and must be prepared to show they are suitable homes

- Are they permanent people? (not on holiday, or studying from overseas or any other situation where they will need to leave).
- Have they suitable LONG TERM accommodation for dog and themselves, not renting with short tenancy/ no dog allowed etc. At a time when more people find themselves unable to afford to buy their own homes, short term tenancies and the need to find new accommodation are a difficult time for people and even more difficult for dog owners.
- And all the other types of things responsible breeders ask about.
 - What has happened to every dog you have ever owned?
 - What is your accommodation?
 - Yard?
 - Is it fenced, adequately, taking into account size of dog?
 - Do you own the property or are you renting?
 - If renting, how long is your tenancy?
 - Do you understand how difficult it is to find new accommodation with a dog? (minimum tenancy time before allow ownership?)
 - Are you a permanent resident, are you planning on returning overseas after study, holiday etc.
 - Do you have any other dogs?
 - Special needs of particular breed /type/size of dog?
 - Do you have small children / are you expecting to have small children within the life of the dog and have you considered how that will effect your ability to care for and meet needs of dog and children?
 - Are you aware of costs of dog ownership, de-sexing, vaccinations, registrations, general veterinary care cost, health insurance?
 - Do you understand the needs of dogs, social as well as physical?
 - Have you made plans on how to train and socialise the dog?
 - If something happens (loss of accommodation, family breakdown, loss of employment) do you have somebody who can help by looking after the dog if necessary?

Now we have established that not everyone who wants a dog is a suitable home / owner.

3.- Establish who the buyer is

The first part of being a suitable home should be establishing who the purchaser is.

What about a 100 point check, like a bank?

This would establish person's name and address, first step in answering honestly at least some the types of questions listed above.

A form could be downloaded and completed, copies to both buyer and seller with microchip details, copy to council on registering.

Some people will lie and cheat, but education and "vetting" of buyers would reduce the demand for dogs and should all but eliminate impulse purchases, especially if pet shops are no longer allowed to sell puppies.

4. – Buyers must have homes

In Australia it is a time when fewer people can afford home ownership and unlike some overseas countries, the rental home market in Australia does not seem to successfully provide permanent homes for renters. In some overseas countries renting is permanent but that is not the case here. So this is a problem.

What is the minimum length of tenure of home that someone proposing to buy a dog should have? Every time you move you will need to find pet friendly accommodation.

Now hopefully we reduced the number of potential puppy owners to those realistically with a chance to home and raise a happy and healthy puppy?

For commercial operations, the reduced demand should reduce the financial viability of their operations and hopefully reduce puppy farms.

5. – Emergency Planning

We can't allow puppies to go to just any home, but if there is a breakdown in the home unit, or accommodation, people should have at least thought about where the dog might go safely (last dot point above).

Have they considered a "safety net" person in case of emergencies? Is there someone?

This leads me to the two dog rule, from the Dog Act I understand.

If there is a breakdown in the family home as does happen, other carers may be needed as an alternative to surrendering a dog to a shelter.

Some people already with dogs are not able to take other "family" dogs because they already have dogs, due to the two dog rule.

Councils rigidly maintain the two dog rule, and when I used to read the local paper, the council granting an extra dog exemption was reported, they were so unusual.

What about an exemption for a dog entering a home instead of being surrendered to a shelter? All dogs to being de-sexed, exemption to end when oldest dog dies.

This is do-able but would require councils to evaluate circumstances. I know some people are dishonest, but isn't it better to have a 3 dog family for a while rather than a dog being surrendered to a shelter?

Summary

The objective of the debate is meant to be to reduce unwanted or uncared for dogs.

This requires examining not only dog breeding but more importantly dog purchasing and ownership.

It doesn't matter how well a breeder cares for a puppy if that puppy is sold to a home that cannot or will not care for it.

If demand decreases because it is more difficult to satisfy criteria for being allowed to buy dogs, the price should drop making it less attractive for puppy farmers who are only breeding as a business for profit.

Yes, stop puppy farming, but try not to destroy the responsible breeding of dogs as a side effect.

If the process destroys much of the hobby breeding the cost of puppies will soar making farming of puppies even more financially viable.

Please indicate whether you are any of the following:

- ☒ Dog Owner
- ☐ Dog Breeder
- ☒ Member of a dog breeder association
- ☐ Pet Shop Owner or Operator
- ☐ Pet Business – please specify below
- ☐ Local Govt. employee or elected member
- ☐ Local Government
- ☐ Other Government authority or agency employee
- ☐ Shelter or Rescue organisation employee or volunteer
- ☐ Dog Foster Carer
- ☐ Veterinarian
- ☐ Livestock Working Dog Owner
- ☐ Microchip database company
- ☐ Other – please specify: _____

Transitioning Pet Shops to Adoption Centres

1.1 Introduction

As detailed in the Stop Puppy Farming Consultation Paper, it is intended to amend the Dog Act 1976 (the Dog Act) so that pet shops will only be able to source puppies and dogs for sale from 'properly accredited' rescue organisations or shelters.

The areas of implementation on which further input is sought are:

- the accreditation of rescue organisations or shelters;
- the assessment of the health and behaviour of dogs;
- the period to transition pet shops to adoption centres;
- the arrangements that will need to be developed between pet shops and rescue organisations and shelters; and
- enforcement, including who will be responsible and how enforcement will be undertaken.

1.2 Accreditation of rescue organisations and shelters

Under the new proposals, pet shops will only be able to source puppies and dogs for sale from 'properly accredited' rescue organisations or shelters. Dog rescue organisations and shelters will be accredited by the State Government.

Questions – All

1. What information should a rescue organisation or shelter provide when applying for accreditation?
 - ☒ Information on the standard in which animals in their care are kept
 - ☒ Information on operational policies to include
 - Assessment standards in evaluating dogs.
 - What information is made available to purchasers both about dog and the dog's background and needs.
 - Evaluation of success and failure in attracting suitable "homes".

Questions – All

- Evaluation of success and failure in successfully matching homes and dogs.
 - ☒ Information on rehoming policies
 - ☒ Evidence of compliance with relevant laws, including the Dog Act, Animal Welfare Act and any relevant local laws or by-laws
 - ☒ Information on the number of animals in their care
 - ☒ Staff training and qualifications
 - ☒ Other – please specify:
- no dogs should be sourced from outside of state, this just gives the wrong people an incentive to produce more dogs.
2. What should the Government consider when accrediting a rescue organisation or shelter?
- How it funds itself.
 - Standard of care of dogs
 - Not anti-dog establishments but rehoming
 - The assessment process for evaluating suitability of dogs for rehoming and homes as suitable for a dog.
3. Should these organisations be monitored?
- ☒ Yes
- They must be approved by Government and demonstrate they can meet whatever minimum standards are currently community standards.
- ☐ No
- ☐ Unsure
- ☐ Depends on the following factors (please specify): _____
4. How should they be monitored?
- ☒ Audits
- ☒ Inspections
- ☒ Annual reporting
- ☐ Unsure
- ☐ Not applicable – they should not be monitored
- ☐ Other: _____ Without adequate monitoring there are no guarantees that dogs are cared for and not puppy farmed there.

Questions – All

Questions – Animal Rescue Organisations and Shelters

5. Is your organisation likely to apply to be an accredited rescue organisation or shelter that can provide dogs to pet shops?
- ☐ Yes
 - ☐ No
 - ☐ Unsure
 - ☐ Depends on the following factors (please specify): _____
6. What would prevent your organisation from applying to be an accredited rescue organisation or shelter?

Questions – Government and non-Government agencies

7. Do you believe your agency should have a role in accrediting rescue organisations and shelters?
- ☒ Yes
Dogs West breed specific clubs run rescue operations for their breed of interest, including those of their breed but not bred by them. With specialised breed knowledge and experience they are ideal for this and in some cases have lists of people looking for older or second dogs.
 - ☐ No
 - ☐ Unsure
 - ☐ Depends on the following factors (please specify): _____

Please specify reasons for your response: _____

8. If you answered yes, what would this role be?
- Breed specific rescues, run by specialists in the breed.

1.3 Assessment of the health and behaviour of dogs

The origins of dogs in rescue organisations and shelters is generally unknown. To provide confidence to potential new owners, it is intended that every dog supplied to a pet shop must pass a health and behavioural assessment. Pet shops will need to ensure that each dog has a health and behavioural certificate.

Questions – Pet Shop Owners and Operators and Animal Rescue Organisations and Shelters

9. Should it be the responsibility of the pet shop or the rescue organisation or shelter to have a dog submitted to a vet for a health and behavioural assessment?
- ☐ Pet Shop – no pet shops should sell dogs or puppies
 - ☒ Rescue organisation or shelter that is selling dog
 - ☐ Unsure
10. Who should be responsible for bearing the cost of that assessment?
- ☐ Pet Shop – not pet shops should sell dogs or puppies
 - ☒ Rescue organisation or shelter that is selling dog
 - ☐ Unsure
11. Who should be responsible for carrying out the health and behaviour assessment?
- ☐ Veterinarian
 - ☐ Dog behaviouralist
 - ☐ Dog trainers
 - ☐ Other – please specify: The cost of any assessment should be included in the cost of the dog, only the cost, no profit or mark-up
Trained qualified and have working knowledge for a reasonable fee only with no price gouging or inflation.
 - ☐ Unsure

Questions – Veterinarians

12. What aspects of a dog's health and behaviour should be assessed by a veterinarian?
- ☐ Physical health
 - ☐ Temperament
 - ☐ Response to adverse situations (noise etc.)
 - ☐ Ability to be trained
 - ☐ Interaction with other animals
 - ☐ Other – please specify: _____

13. What would this cost?

1.4 Transition period

Pet shops will be gradually transitioned into adoption centres to allow time for pet shops to make arrangements with dog rescue organisations and shelters.

Option 1 – Two year transition

Under this option, pet shops will be transitioned within two years of the legislation coming into effect.

In the interim, pet shops will be able to source puppies and dogs as they currently do.

Option 2 – Five year transition

Under this option, pet shops will be transitioned within five years.

From date of amendment to the Dog Act	Where pet shops can source dogs:
0 to 2 years	Pet shops can source dogs from a dog breeder registered as such on the centralised database.
2 to 5 years	Pet shops selling dogs will be required to source dogs from accredited dog rescues and shelters, but can still also source dogs from registered breeders.
5 years onwards	Pet shops can only source dogs from accredited dog rescues and shelters.

Questions – All

14. Please indicate your preference for the following:

- ☐ Option 1 – Two year transition of pet shops to adoption centres.
- ☐ Option 2 – Five year transition of pet shops to adoption centres.
- ☒ Other transition period – please specify: Immediately cease – no dogs
to be sold by pet shops ever _____

Please indicate reasons for your preference: _____

Questions – Pet Shop Owners and Operators

15. What support can be provided to transition pet shops into adoption centres?

1.5 Arrangements between pet shops and rescue organisations and shelters

It is likely that pet shops will need to form arrangements with accredited dog rescue organisation and shelters to ensure the responsible supply of dogs.

Questions – Pet Shop Owners and Operators

16. At the end of the transition period, is your pet shop likely to source dogs from accredited dog rescue organisation and shelters?

- ☐ Yes
- ☐ No, our pet shop will cease to sell dogs
- ☐ Unsure

17. Why or why not?

18. Would a template agreement that could be used by pet shops and dog rescue organisations and shelters be helpful?

- ☐ Yes
- ☐ No
- ☐ Unsure

19. Arrangements between pet shops and dog rescue organisations and shelters should cover the following aspects:

- ☐ Housing of dogs on premises
- ☐ Responsibility for the behaviour and health check
- ☐ Liability
- ☐ Other – please specify: _____

Questions – Animal Rescue Organisations and Shelters

20. Would a template agreement that could be used by pet shops and dog rescue organisations and shelters be helpful?

- ☐ Yes
- ☐ No
- ☐ Unsure

21. Arrangements between pet shops and dog rescue organisations and shelters should cover the following aspects:

- ☐ Housing of dogs on premises
- ☐ Responsibility for the behaviour and health check
- ☐ Liability
- ☐ Other – please specify: _____

1.6 Enforcement

It is estimated that there are approximately 15 pet shops in Western Australia that sell puppies and dogs. After the transition period, pet shops will need to be monitored to ensure they are only sourcing dogs from accredited dog rescue organisations and shelters.

Furthermore, during the transition period pet shops would need to be monitored to ensure they are only sourcing dogs from registered dog breeders (following the introduction of dog breeder registration).

Pet shops could be monitored in a number of ways:

Option 1 – Public monitoring

Pet shops would be required to display a certificate confirming the source of the dog is from an accredited rescue organisation or shelter. The public could report pet shops to an enforcement agency that are not providing a certificate verifying the dog's source.

Option 2 – Inspections

An enforcement agency would be responsible for inspecting pet shops that sell dogs, whether randomly or periodically, and require the pet shop to provide information upon request.

Option 3 – Audits

Pet shops would be required to be audited by a particular enforcement agency, whether periodically or randomly.

Option 4 – Audited and inspected upon complaint

The enforcement agency would inspect and audit a pet shop only where concerns were raised about the pet shops compliance with the laws.

The type of enforcement undertaken will assist in informing what agency is best placed to undertake enforcement. The capacity and resources of the agency would also need to be considered.

Questions – All

22. Should pet shops have to register with a relevant authority if they sell dogs?

- ☒ Yes – don't they already?
- ☐ No
- ☐ Unsure

23. Should it be an offence to fail to register?

- ☒ Yes
- ☐ No
- ☐ Unsure

24. What information and records should a pet shop maintain to ensure compliance with the pet shop provisions can be monitored?

- ☒ Records of where dogs have been sourced from
- ☒ Details of new owners
- ☒ Details of health and behaviour checks
- ☒ Other – please specify: all of the above plus guessed age, time in rescue, photo, microchip information

25. What information and records should a rescue organisation and rescue maintain to ensure pet shops can be monitored and information verified? The same as any breeder keeps about all their dogs – history of dog's care, arrival/duration in care, microchip details, photos of identifying marks etc

26. How should a pet shop be monitored for compliance?

- ☐ Option 1 – Public monitoring

Questions – All

- ☒ Option 2 – Inspections
- ☒ Option 3 – Audits
- ☐ Option 4 – Audited and inspected upon complaint
- ☒ Other – please specify: Twice yearly inspections and review of all tracking information.

Questions – Local Governments

27. If enforcement was cost recovery, what would local governments' capacity be to enforce these provisions?

Mandatory Dog De-sexing for Non-Breeding Dogs

2.1 Introduction

Currently, dogs are not required to be de-sexed in Western Australia. Owners are encouraged to de-sex their dogs, and owners of de-sexed dogs pay a lower dog registration fee than owners of other dogs.

A recent survey of Western Australian local governments, with 43 out of 137 local governments responding, found that 82% of registered dogs were de-sexed.

The additional consultation in this document focuses on the following elements of implementation:

- Age of mandatory de-sexing
- Age for registration and microchipping
- Additional exemptions
- De-sexing vouchers
- Enforcement

This paper supplements, rather than replaces, the consultation paper. Please also answer the questions in that paper.

2.2 Age of mandatory de-sexing

The Dog Act will be amended to require all dogs to be de-sexed by the time they reach a particular age.

Option 1 – By three months of age

This would be consistent with the current requirement for registration and microchipping and with the age for de-sexing dangerous (restricted breed) dogs. Dogs are generally unable to breed before the age of three months so this age eliminates the risk of unwanted puppies being born.

Exemptions issued by veterinarians are proposed for dogs that are too young to be de-sexed. Dogs to be used for breeding would also be exempt.

Option 2 – By six months of age

Opinions differ on the best age for de-sexing with many veterinarians preferring not to de-sex a dog until it is close to six months old.

Both male and female dogs are generally able to breed by six months, with the females of smaller breeds becoming sexually mature by four months. Larger breeds may not be sexually mature for a year or more.

South Australia and the Australian Capital Territory have introduced mandatory dog de-sexing by six months old.

Questions – All

1. Please indicate your preference for the following:

- ☐ Option 1 – mandatory de-sexing by three months of age, unless an exemption applies.
- ☐ Option 2 – mandatory de-sexing six months of age, unless an exemption applies.
- ☒ Another age – please specify: 12 months

Please provide reasons for your preference: I do not accept mandatory de-sexing.

I will always buy from a ANKC registered breeder, but puppy farmers will have time and money and resources to make sure they can circumvent any restrictions on their activities

If pet shops and puppy farms are stopped, we shouldn't need such draconian measures.

Where are our nicely bred and raised puppies to come from.

There are concerns about impact of sterilisation on development and health.

My breed of dog needs to have its gene pool conserved, mandatory de-sexing will not enable breeders to wait and select the best prospects for breeding.

2. If you have a de-sexed dog, at what age was it de-sexed? 4.75 years

2.3 Age for registration, microchipping and de-sexing

Currently dogs are required to be registered and microchipped by the time they are three months old.

The following addresses possible ways to deal with registration and microchipping if the requirement for de-sexing is set at six months.

Option 1 – Registration, microchipping and de-sexing by six months

Under this option, the Dog Act would be amended so that registration, microchipping and de-sexing must be completed by the time a dog reaches six months of age.

The benefits include:

- enabling local governments to sight evidence of microchipping and de-sexing at the time of registration
- administrative efficiency for local governments
- less confusion for owners, which would increase compliance
- convenience for dog owners in being able to have their dog microchipped and de-sexed in the same veterinarian visit.

The key disadvantage is the inability to identify dogs (either by registration records or microchips) before six months. This may result in dogs not being returned to owners and being sent to the pound and/or a dog rescue or shelter.

Option 2 – Limited registration at three months; full registration on de-sexing

This option proposes the following:

- the retention of the current provisions under the Dog Act requiring dogs to be registered and microchipped by three months of age, and
- a short-term registration (three months) for dog owners registering a dog that has not been de-sexed.

This allows dogs to be identified from three months of age but provides an additional administrative burden on both the owner and the local government in having to register a dog twice.

Option 3 – Registration at three months; onus on owner to advise when dog de-sexed

Under this option, the owner would be responsible for notifying the relevant local government once their dog was de-sexed. The owner would need to provide a copy of the sterilisation certification to the local government – this could be done by email or attached to an electronic form.

The local government would then update the registration database. This would create an additional administrative burden on local governments.

Questions – All

3. Please indicate your preference for the following:

- ☐ Option 1 – registration, microchipping and de-sexing by six months
- ☐ Option 2 – limited registration at three months; full registration on de-sexing
- ☒ Option 3 – registration at three months; onus on owner to advise when dog de-sexed.

Please provide reasons for your preference: I don't agree with mandatory de-sexing. Responsible owners have always managed Option 3. , and this includes the vast majority of owners

Questions – Veterinarians

From 1 July 2018 South Australian veterinarian practices will be responsible for updating a centralised dog registration database when a dog is de-sexed. This would replace the need to issue a sterilisation certificate.

4. Would you support this approach?

- ☐ Yes
- ☐ No
- ☐ Unsure

Please provide reasons for your response: _____

2.4 Additional possible exemptions from de-sexing

Exemptions from mandatory de-sexing will apply for health and welfare reasons as assessed by a veterinarian, and if the dog owner is a registered breeder.

Livestock working dogs

Livestock working dogs require particular traits, with dogs that demonstrate these traits being bred to ensure that future working dogs also have these particular traits. Livestock working dogs are generally only used for breeding once the dog has a proven ability as a working dog, usually by two to three years of age.

If a primary producer is required to de-sex their dog at an early age, they will not be able to assess whether a dog has the desirable traits and should be used for breeding. Mandatory de-sexing could reduce the working dog gene pool.

On the other hand, unintended breeding could result in unwanted dogs.

Questions – All

5. Should livestock working dogs be exempt as a class from mandatory dog de-sexing?

- ☒ Yes
☐ No
☐ Unsure

Please provide reasons for your preference: No mandatory sterilisation, they need to be able to select for and breed the best dogs to do their jobs. Working ability needs to be assessed without a time limit.

6. If working dogs are required to be de-sexed by a particular age, at what age should working dogs be required to be de-sexed? Not until they are old enough to have been assessed on their working ability to decide if they will be needed to contribute to future generations of their breed / stock
7. How could this be enforced? Can't be enforced and won't be enforced so why make laws which can't and won't be enforced. Is there any indication that working dogs play a role in puppy farming.

Dogs held by persons registered with recognised breeding associations

Dogs that are intended to be used for breeding purposes will be exempt from de-sexing. Owners of dogs intended to be used for breeding purposes will be required to register as a breeder for their dog to be exempt.

Alternatively, a dog could be exempt from de-sexing on the basis that their owner is a member of a 'recognised' organisation. In this situation, a member would need to provide evidence of their membership to the local government for their dog to be exempt.

Dogs West, as an example, is a pedigree breeding association in Western Australia whose members are required to abide by a Code of Ethics.

While members of these associations and organisations could be exempted as a class from de-sexing dogs in their care and ownership, it would not follow that they were also exempt from the requirement to register as dog breeders. Under the dog breeder registration requirements each member that bred dogs would still be required to register as a dog breeder, register each dog in their care and pay the appropriate registration fees. Dog breeder registration allows for the traceability of puppies so action can be taken against unscrupulous breeders. Dog breeder registration is discussed in more detail in section 3.7 to 3.9.

If organisations were recognised in this way, they would be required to update the State Government on each change to membership within seven days of the change occurring.

Questions – All

8. Should members of recognised breeding associations be exempt from the mandatory de-sexing requirement through their membership status?
- ☒ Yes All members of Dogs West should be exempt from mandatory sterilisation, whether they are currently breeders or not.
 - ☐ No
 - ☐ Unsure
9. What criteria should be considered by the State Government in approving recognised organisations? Only organisations with transparent standards with oversight of their breeders' and members' breeding and other activities
Dogs West, of which I am a member is such an organisation. The members are dog lovers who breed, own, train and compete with their dogs. I don't know of any other organisation in WA that meets the standard.
10. Are there any other class of dogs that should be exempt from mandatory de-sexing?
- ☒ Yes NO MANDATORY STERILISATION
 - ☐ No
 - ☐ Unsure

Questions – All

Please provide reasons for your preference:

No mandatory Sterilisation. Not necessary or sensible, its a knee jerk response which would in the long term provide an even more profitable environment for the real puppy farmers.

2.5 Transferring dogs

Dog breeders and dog owners will be required to de-sex any dog transferred to another person unless:

- the new owner is a registered breeder
- the new owner is a member of a recognised association or organisation that is exempt from the mandatory de-sexing requirement
- the dog is exempt by a veterinarian from being de-sexed on health grounds (unless the exemption is because the dog is too young to be de-sexed)
- the dog is too young to be de-sexed and is accompanied by a prepaid de-sexing voucher.

Requiring dog owners and breeders to de-sex a dog before it is transferred will ensure there is compliance with the de-sexing requirements.

In cases where a dog is too young to be de-sexed, it is proposed that a breeder or owner transferring a dog provide the new owner with a pre-paid voucher that will at least partially cover the cost of de-sexing. This aligns with the requirements in the Cat Act.

The cost of having a dog de-sexed varies greatly, depending on such factors as the age and weight of the dog. The voucher could be set at a particular amount with the new owner paying any additional amount.

One of the matters to be considered is how these vouchers could be used at veterinarian practices other than the issuing one. This is important for owners who source their dogs from places far from their homes.

Questions – All

Questions – All

11. Do you support the provision of a pre-paid voucher by the dog breeder if the dog is not de-sexed?

☐ Yes

☒ No mandatory voucher, if you can't afford sterilisation you can't afford a dog. Further, the logistics are ridiculous, voucher with whose vet? etc

☐ Unsure

12. What should be the value of the voucher?

☐ Less than \$100

☐ \$100 - \$149

☐ \$150 - \$199

☐ \$200 - \$249

☐ Over \$250

☒ Other – please specify: _No mandatory voucher, if you can't afford sterilisation you can't afford a dog.

Questions – Veterinarians

13. How much does your practice charge for the de-sexing of a female dog?

Please specify the circumstances that this price is dependent on, and what is included in this cost (for example, fluids, pain medication etc.).

Female dog under 10kg	
Female dog between 10kg – 25kg	
Female dog over 25kg	

Please indicate what is included in this cost: _____

14. How much does your practice charge for the de-sexing of a male dog? Please specify the circumstances that this price is dependent on, and what is included in this cost (for example, fluids, pain medication etc.).

Male dog under 10kg	
Male dog between 10kg – 25kg	
Male dog over 25kg	

Please indicate what is included in this cost: _____

Questions – All

15. How could pre-paid vouchers be transferred between veterinary practices?

16. How many prepaid cat sterilisation vouchers have you issued since the introduction of mandatory de-sexing of cats?

17. How many prepaid cat sterilisation vouchers have you accepted since the introduction of mandatory de-sexing of cats?

18. What methods do you currently use at your practice to de-sex a dog?

- ☐ Spaying
- ☐ Castration
- ☐ Other – please specify: _____

19. Is it likely your practice will use other methods to de-sex dogs in the future, including non-temporary means?

- ☐ Yes
- ☐ No
- ☐ Unsure

Please provide reasons for your response: _____

20. Is there a potential role for the Australian Veterinary Association? For example, to issue pre-paid sterilisation vouchers that can be used at any veterinarian practise. The practise can then cash in the vouchers with the AVA.

- ☐ Yes
- ☐ No
- ☐ Unsure

Please provide reasons for your response: _____

2.6 Enforcement

It is necessary to consider how mandatory dog de-sexing will operate alongside the current requirements under the Dog Act; and how local governments can efficiently monitor compliance.

Currently, local governments are responsible for monitoring and enforcing compliance with the following requirements under the Dog Act:

- dogs to be registered with the local government by the age of three months
- dogs to be microchipped by the age of three months.

Local governments check compliance with the microchipping requirement at the point of registration. A local government can refuse to register a dog that is not microchipped and it is an offence for a person to keep a dog over the age of three months if it is not registered. Effectively, an owner must have their dog microchipped before they can register a dog with their local government.

Owners of certain dangerous dogs are currently required to de-sex their dogs. A dog owner is required to provide a dog sterilisation certificate issued by a veterinarian as evidence that the dog is de-sexed. Alternatively, a dog's de-sexed status can be checked by the local government by viewing a sterilisation tattoo on the dog's ear, although this method of marking a dog is now rare.

Local governments would appear to be the relevant authority responsible for monitoring and enforcing the compliance of mandatory dog de-sexing, especially at the point of registration.

Currently, owners who register de-sexed dogs with their local government pay a lower registration fee than owners of dogs that are not de-sexed, creating an incentive for owners to de-sex their dog. It is proposed to maintain a lower registration fee for de-sexed dogs to further incentivise de-sexing.

Questions – All

21. Who do you believe is best placed to monitor compliance with de-sexing?

- ☒ Local Governments
- ☐ Other – please specify: _____

Please provide reasons for your preference:

I don't agree with mandatory de-sexing.

We already provide to councils information about our dogs including evidence if it is de-sexed.

Nothing I have read or seen suggests that the genuine puppy farmers would be effected by this. The more you restrict dog breeding, the higher prices for puppy farmers and more profit for them.

Questions – Local Governments

22. What costs do you currently incur in registering a dog? Please provide as much detail as possible.

Item _____	Cost \$ _____
Item _____	Cost \$ _____
Item _____	Cost \$ _____

23. What additional costs would you incur if you also checked a sterilisation certificate or exemption certificate at the time of registration?

Item _____	Cost \$ _____
Item _____	Cost \$ _____
Item _____	Cost \$ _____

24. What other costs would mandatory de-sexing impose on a local government?

Item _____	Cost \$ _____
Item _____	Cost \$ _____
Item _____	Cost \$ _____

25. What benefits would be gained by your local government with mandatory de-sexing? Please provide as much detail as possible.

Item _____	Cost \$ _____
Item _____	Cost \$ _____
Item _____	Cost \$ _____

26. At what level would the registration fee need to be set for your local government to recover costs?

For de-sexed dogs? \$ _____

For non-de-sexed dogs? \$ _____

Centralised Registration System

3.1 Introduction

A key element of the McGowan Government's Stop Puppy Farming commitment is the introduction of an online centralised dog registration system in Western Australia.

The centralised registration system will be used to identify every dog or puppy by recording:

- dog registrations
- dog breeder registrations
- any change in ownership of dogs or puppies.

The Dog Act will be amended to make it a requirement to register on the system and update particular information on the system within seven days of the change occurring.

The additional consultation in this document focuses on the following elements of implementation:

- General
 - Access to the system
 - Additional information to be included in the system
- Dog Registrations
 - Dog registration information to be included in the system
 - Updating dog registration information in the system
 - Transitioning existing dog registers
- Dog Breeder Registrations
 - Application and approval of dog breeder registrations
 - Conditions of dog breeder registration
 - Exemptions
- Transferring a dog

Current situation

Local Governments

Currently under the Dog Act, the local government is responsible for keeping a record of dogs registered in their district. The dog register is specific only to that local government district (unless two or more local governments work together to maintain a joint system). This can create difficulties in identifying lost dogs from different local government districts, particularly if a dog's microchip information has not been updated with the current owner's details.

The local government is responsible for processing dog registration applications and can refuse to register a dog on specific grounds, such as when a dog is not microchipped.

The local government issues each dog registered in their district with a registration number and a registration tag.

Dog breeders

Dog breeders in Western Australia are not currently required to register as 'dog breeders'. They are, like all dog owners, required to register their dogs with their local government. They are also required to obtain an exemption or kennel establishment licence if they keep more dogs on any one premises than is permitted.

3.2 Access to the System

	View and update own information	View and update all information	Limited dog breeder verification information*	Search for dogs on the system
Dog owners	X			
Dog breeders	X			
Local governments and State government authorities	X	X	X	X
Members of the public			X	
Dog management facilities and recognised dog shelters and rescues	X		X	X

*As a minimum, the information on the dog owner that will be shown to a member of the public will include:

- their name;
- their postcode;
- their unique dog owner number; and
- their dog breeder registration status.

Questions – All

1. Are any other authorities or groups that should have access to the system?

☐ Yes – please specify below.

☐ No

☒ Unsure: I have concerns about privacy. Who else could you be proposing has access to information about us and our dogs?

Please specify:

2. What type of access should they have?

☒ View their own records

☒ Update their own records

☐ View all records

☐ Update all records

☒ Approve changes to records

3.3 Additional information

The breadth of information recorded on the centralised registration system will affect how it can be used, and by whom it can be used. It is also likely to affect the cost.

There is the potential to record additional information on the centralised registration system, including the following:

- A register of approved kennel establishments in Western Australia (including the ability to apply for a kennel establishment licence on the system)
- A register of dog management facilities in Western Australia
- A register of pet shops transferring and selling dogs in Western Australia
- A register of dangerous dogs (declared and restricted breed)
- Information on particular dog owners, such as dog owners that are subject to a court order or have been convicted of offences under:
 - the Dog Act
 - a dog local law or by-law
 - the Animal Welfare Act
- Information on dogs:
 - that have been seized by the local government at any time
 - that have been involved in a dog attack
 - that have not been controlled by their owner in accordance with the Dog Act
 - that have caused a nuisance or are subject to a nuisance complaint
 - that are subject to a destruction order
- Information to inform compliance with the standards for dog breeding, housing, husbandry, transport and sale.

The benefit of keeping this information is that these facilities, businesses, dogs and dog owners could be more readily identified and monitored by relevant authorities.

The inclusion of this additional information could result in additional costs, including:

- costs associated with creating a system that included and stored this additional information
- costs to particular stakeholders who would be responsible for uploading this information
- costs to local governments in processing this information
- costs to relevant enforcement authorities in monitoring this information.

Dog registration fees, and dog breeder registration fees would need to accommodate these costs.

Cat Registration

Currently under the *Cat Act 2011*, local governments are responsible for:

- processing cat registration applications;
- approving cat breeder applications; and
- maintaining a register of cats in their district.

As with dog registers, cat registers are specific only to that local government district (unless two or more local governments work together to maintain a joint system).

Questions – All

3. Do you think the system should also be expanded to include cat registrations and cat breeder registrations?

- ☐ Yes
☒ No
☐ Unsure

4. Do you think any of the following additional information should be included on the centralised registration system (you may select more than one option):

- ☐ Approved kennel establishments
☐ Dog management facilities
☐ Pet shops that sell or transfer dogs
☐ Dangerous dogs
☐ Dog owner's subject to Court orders or convicted of particular offences
☐ Dogs that have been seized by the local government
☐ Dogs involved in a dog attack
☐ Dogs that have not been controlled by the owner
☐ Dogs that have caused a nuisance or are subject to a nuisance complaint
☐ Dogs that are subject to a destruction order
☒ Other information – please specify: _____

Please indicate reasons for your preference/s: Without knowing who can see the above information I don't know who should see it. Don't local govt already have most of this?

5. Would you support a larger increase in dog registration fees to include additional information on the system?

- ☐ Yes

☒ No It is not for our benefit to endlessly expand information holdings, the local councils would have most of this already, and can share it with other councils as required.

☐ Unsure

6. How much *extra* would you be prepared to pay for an annual dog registration to cover these costs?

☐ \$1 - \$5

☐ \$6 - \$10

☐ \$11 - \$15

☐ \$16 - \$20

☐ More than \$20

7. Who do you think should have access to this additional information?

☒ Only local governments Until we know exactly what is held I can see no reason to expand the access

☐ Animal welfare agencies

☐ Other – please specify:

Questions – Local Governments

8. Would it be beneficial for your local government if cat and cat breeder registrations were also transitioned to the centralised registration system?

☐ Yes

☐ No

☐ Unsure

9. How would transitioning cat and cat breeder registrations to a centralised registration system be beneficial to your local government?

☐ Administrative efficiency

☐ Consistency with centralised dog registrations

☐ No requirement to maintain own register

☐ Other – please specify: _____

☐ It would not be beneficial – please specify: _____

10. Would any of the additional information outlined above be useful for your local government?

☐ Approved kennel establishments

☐ Dog management facilities

☐ Pet shops that sell or transfer dogs

☐ Dangerous dogs

- ☐ Dog owner's subject to Court orders or convicted of particular offences
- ☐ Dogs that have been seized by the local government
- ☐ Dogs involved in a dog attack
- ☐ Dogs that have not been controlled by the owner
- ☐ Dogs that have caused a nuisance or are subject to a nuisance complaint
- ☐ Dogs that are subject to a destruction order
- ☐ Other information – please specify: _____

Please indicate why you think it would be useful: _____

11. What additional costs would including this information in the system create for your local government?

- ☐ Processing the additional information
- ☐ Monitoring the additional information
- ☐ Other: _____

12. How much *extra* do you estimate this would cost your local government per annual dog registration?

- ☐ \$1 - \$5
- ☐ \$6 - \$10
- ☐ \$11 - \$15
- ☐ \$16 - \$20
- ☐ More than \$20

13. Would it be easier for your local government to process and record kennel establishment licences through the system?

- ☐ Yes
- ☐ No
- ☐ Unsure

Please give your reasons: _____

3.4 Dog registration information

The breadth of information recorded on the centralised registration system will affect how it can be used, and by whom it can be used. It is also likely to affect the cost.

General information

Dog registration information that will be kept on the centralised registration system will include:

- Current information requirements: the information a dog owner must currently provide to register a dog in Western Australia is set out under Form 4 of Schedule 1 of the *Dog Regulations 2013*. This includes information on the following:
 - dog owner details, including their address and contact details
 - whether the dog can be effectively confined to the premises
 - dog details, including age, breed, microchip details, whether the dog is a commercial security dog or a dangerous dog
 - the number of dogs on the premises
 - information on any previous convictions for offences against the Dog Act, Cat Act or Animal Welfare Act
 - a declaration that the information in the application is true and correct
- In addition, dog owners will be required to provide:
 - further information on their dog's sterilisation status
 - their unique dog owner number (if known, otherwise they will be issued with one)
 - the dog owner number of the dog's breeder (if known).

This is the minimum level of dog registration information that will be stored on the centralised registration system.

Questions – All

14. Please indicate if you think any of the additional information should be included on a dog's registration:

- ☐ information on whether the dog is used as a livestock working dog
- ☐ information on whether the dog is used as an assistance dog

Please indicate why you think this information will be beneficial: Livestock Working dogs already registered. No justification to enlarge information holdings.

3.5 Updating dog registration information

The online centralised registration system will have the capacity to allow a range of users to register and update information recorded on the system in Western Australia.

Verification of some of the information recorded on the system will need to be undertaken to ensure the information is accurate, such as the sterilisation status of a dog.

The following users will be able to register a dog on the centralised registration system:

- dog owners
- local governments on behalf of dog owners (registrations made in person or hard copy form)
- dog shelters and rescue organisations
- dog management facilities.

The following stakeholders will be able to use the system to register as a dog breeder on the centralised registration system:

- dog owners (who wish to breed from their dog)
- local governments on behalf of dog breeders (registrations made in person or hard copy form)
- dog shelters and rescue organisations
- dog management facilities.

Local governments will be responsible for approving dog and breeder registrations in their district. The registration will not be complete until approved by the local government. In the process of approving dog registration applications, local governments can verify the microchip and de-sexing details through, for example, examining the dog's sterilisation certificate.

Potential Role for Veterinarians

Another possible option is that veterinarians use the system to update the system with a dog's de-sexed and microchip information. In South Australia and New South Wales, veterinarians are able to update their centralised system with a dog's microchip details. The advantages of this are:

- a veterinarian can verify the de-sexing and microchipping of the dog without a local government having to examine a sterilisation certificate
- this is likely to be a more accurate and reliable method
- local governments can quickly process dog registrations as they do not have to confirm the microchip and de-sexing details (unless not already entered)
- the information is verified and entered in the system at the point of microchipping and de-sexing, meaning there is no delay in updating this information.

This will create a cost to veterinarian practices who will need to expend time and resources on undertaking this function.

Veterinarians will not be responsible for ensuring dog owners comply with the microchipping and de-sexing requirements. They will also not be obliged to notify a local government of a dog owner's non-compliance with the requirements.

Under this proposal, a veterinarian will be able to update a registered dog's details. If the dog is not registered prior to the veterinarian undertaking the microchipping and/or de-sexing, the veterinarian will still be able to enter the dog's microchip details and sterilisation status into the centralised registration system.

Owners will then be responsible for searching the system for the microchip details of their dog, and completing their registration.

Questions – All

15. Do you think veterinarians should be able to update and input dog's microchip and sterilisation details into the system?

- ☒ Yes
☐ No
☐ Unsure

Please indicate why it would be useful: It is useful but not at an extra cost, I can and do supply the information to the council.

16. Should it be a mandatory requirement for veterinarians to input this information into the system, or optional for veterinarians to input this information?

- ☐ Mandatory Until we know exactly what is held I can see no reason to expand the access
☒ Optional
☐ Not applicable

Please provide reasons for your preference: Cost owner nothing to do this already

Questions – Veterinarians

17. Would you or your practice be willing to undertake this function to ensure the accurate recording of dog microchip and de-sexing details?

- ☐ Yes
- ☐ No
- ☐ Unsure

18. What costs would you or your practice incur by undertaking this role? Please quantify where possible.

- ☐ Administrative costs involved with inputting information
- ☐ Other: _____
- ☐ Other: _____

Please identify and quantify costs where possible: _____

19. Do you perceive any benefits in undertaking this role?

20. Please indicate what other information you think veterinarians should be able to update or access on the system?

- ☐ Enter a dog registration on an owner's behalf
- ☐ Search for the identity of a dog and its owner
- ☐ Enter vet specific information on any registered animal
- ☐ Report and enter details of animal incidents such as dog attacks
- ☐ Report dog deaths
- ☐ Other – please specify: _____

3.6 Transition existing dog registers

Introducing a centralised registration system will mean the information in the existing local government dog registers will need to be transferred to the central register. This could be phased in over a number of years.

Local governments currently use at least five different registration systems, ranging from a sophisticated purpose-built database to a spreadsheet. A survey of local governments, with 53 local government respondents, found that 68% used Synergy, 13% used Civica, 8% used TechnologyOne, 8% used Pathway and 2% used an Excel spreadsheet.

Annual dog registrations

It is proposed that annual dog registrations will be transferred to the centralised system from the local government systems on renewal. Under the Dog Act, annual dog registrations expire on 1 November of every year.

Once the centralised registration system is developed and launched, annual dog registrations will be incorporated into the centralised registration system by requiring dog owners to renew their annual dog registration through the centralised system.

Essentially, dog owners that have registered their dogs annually will be captured when they renew their dog registration.

Three year dog registrations

Similar to annual dog registrations, owners that have registered their dog for a period of three years will be transferred to the centralised system when they renew their dog's registration. As for annual registrations it will be the owner's responsibility to enter their data into the new system at the time of re-registration.

This means that it will take the centralised system three years to incorporate the three year period dog registrations.

Lifetime dog registrations

Lifetime dog registration means the owner never has to renew their dog's registration. As such, their dog's registration cannot be recorded on the centralised dog registration system through the renewal of the registration.

There are three options to capture lifetime dog registrations on the centralised system:

Option 1: Software

Data migration software could be created to transfer the information in each local government's register to the centralised system.

Software created to transfer dog registration information from local government systems to the centralised system would need to be specific to each type of software system the local governments currently use. It is not known if local governments using the same registration system have it configured in the same way. The expense of creating data migration software for each system would be significant, and adequate time would be needed to develop the data migration software for each type of registered software used by local governments.

Dog registration fees would have to increase to cover the costs of funding the data migration software or a one off registration charge apply for registrations on the new system.

Option 2: Manual entry

Another option is to manually transfer the lifetime dog registrations to the centralised system. This would require local government staff to enter the information.

It would also mean that local government resources would be used on transferring information as opposed to undertaking other local government duties. It would, however, mean that local governments would no longer have to manage a dual system of registrations so there would be time and cost savings in the medium and longer term.

Sufficient time would also need to be provided to allow local governments to transfer the information – this could be three years in line with the transition of the three year registrations.

Option 3: Owner's responsibility

Another option is to make it the responsibility of existing owners to re-register under the new centralised system.

Local governments could identify lifetime registrations on their system and send letters and information to owners with lifetime dog registrations instructing them to re-register their dog on the centralised system. There would be no charge for this process.

Upon re-registering online, owners would complete a specific registration form identifying them as a dog owner with an existing lifetime dog registration. Local governments could confirm this against their existing register and waive the registration fee.

If a person does not have online access, the local government could process the re-registration on the owner's behalf.

Currently, owners with a lifetime dog registration are not required to update a local government when their dog dies. Local governments are likely to therefore have active registrations for dogs that have passed away. One advantage of owners re-registering their lifetime dog registrations is that the register will not be updated with deceased dogs.

There is a risk that owners will not undertake the re-registration and may not re-register their dog.

Questions – All

21. Please indicate your preference for the following:

- ☐ Option 1 – Develop and provide data migration software to transfer lifetime dog registrations to the centralised registration system.
- ☐ Option 2 – Local governments manually enter lifetime dog registrations into the centralised registration system.
- ☐ Option 3 – Owners re-register their lifetime dog registration on the centralised registration system.

Please indicate reasons for your preference: _____

22. Are there other options for transferring existing dogs onto the centralised system? What percentage are lifetime registered dogs? Can't be that many do it manually?

23. Which of the following would you support to cover the costs of migrating existing data?

- ☐ an increase in the registration fee
- ☐ a one-off payment by dog owners
- ☐ other
- ☒ none Cost should be borne by Government, Government meets costs of other registers. We already pay to register our dogs, if government wants to change registration system, government can pay.

One option is that existing lifetime dog registrations are not transferred to the new system and local government registers would need to be retained for at least a 15 year period following the launch of the centralised system and authorities would have to refer to both the centralised system and individual local government dog registers.

24. Should lifetime dog registrations be transferred to the new system?

- ☒ Yes
- ☐ No
- ☐ Unsure

Questions – Local Governments

25. Please indicate your local government district and the software you currently use for your dog register:

- a) Local Government district: _____
- b) Dog register software: _____

26. Please indicate if the software used for your local government dog register is the same as the software used for your local government's cat register:

- ☐ Yes
- ☐ No
- ☐ Unsure

27. Have you modified the software you currently use?

- ☐ Yes
- ☐ No
- ☐ Unsure

28. Is your local government easily able to identify lifetime dog registrations in your dog register?

- ☐ Yes
- ☐ No
- ☐ Unsure

29. How many lifetime dog registrations does your local government currently have?

30. Does your local government have the capacity to extract data from your dog register software and provide the extracted data in an Excel spreadsheet?

- ☐ Yes
- ☐ No

☐ Unsure

Questions – Dog Owners

31. Would you prefer:

I already pay to register my dog, if government wants to change how it hold its information that is their issue, not mine. No reason to pay, no improved service, just government policy.

- ☐ dog registration fees to increase to cover the cost of transferring dog registrations to the centralised system;
- ☐ a one-off \$5 fee for an automatic transfer of the data; or
- ☐ to re-register your own dogs online?

32. If you are a dog owner with an existing lifetime dog registration, would you be willing to re-enter your details in the centralised registration system online?

- ☒ Yes Happy to do so, if no additional fees charged. Dog already registered, how govt organises the data is simply their issue, not mine.
- ☐ No
- ☐ Unsure

3.7 Application and approval – dog breeder registration

A dog breeder will be broadly defined under the Dog Act, and will include any owner who has a dog that is not de-sexed, except if the dog is not de-sexed on health grounds.

The requirement to register as a dog breeder will come into effect once the centralised registration system is operational.

While it is envisaged that a majority of breeders will be registered prior to their dog having puppies, dog owners that are not registered will need to register as a breeder within seven days of the birth of puppies. This will ensure the local government has adequate time to process and approve the dog breeder registration application before the puppies are potentially transferred to another owner.

The information supplied by dog breeders at registration will impact the ability of the local governments to make an informed decision on approval of dog breeder registration.

The information cat breeders must provide when applying for approval to breed cats includes:

- the breeder's details, including address and contact details
- the cat's details, including microchip details and sterilisation status
- questions in relation to the breeding of the cat, including the number of cats being kept on the premises, a description of the facilities, and whether they are a member of one of the listed organisations
- the requirement to provide details of any previous convictions against the Cat Act, Dog Act or Animal Welfare Act
- a declaration that the information provided is true and correct.

It is proposed that similar information is provided when dog breeders apply for dog breeder registration. Instead of providing information on the premises and facilities, it is proposed that dog breeders would need to indicate and certify that they were compliant with any minimum standards for dog breeding, housing and husbandry (once they came into effect).

Breeders will be required to renew their dog breeder registrations annually. Registered breeders will also be required to update any change to their information within seven days.

Questions – All

33. What information do you think a dog breeder should provide when applying for breeder registration or renewal?

- ☐ The number of dogs being kept on the premises
- ☐ A description of the premises where the dogs are being kept
- ☐ A description of the facilities
- ☐ The breed of dogs
- ☒ Whether a person has been convicted of an offence under the Dog Act, Cat Act, Animal Welfare Act or a dog or cat local law.
- ☐ **** No standards available yet, how can any agree -Certification that they comply and will continue to comply with animal breeding, housing and husbandry standards
- ☒ Other: please specify: DogsWest membership should be sufficient, we are already registered.

34. What do you think local governments should take into account when considering a dog breeder application or renewal?

- ☒ The number of dogs being kept on the premises

Questions – All

- ☐ The breed of dogs
- ☒ Convictions under the Dog Act, Cat Act, Animal Welfare Act, or a dog or cat local law
- ☒ Other – please specify: If we are Dogs West Registered breeders, there should be no need for further regulation, offences under Dog Act etc are cause for cancellation of membership.

The Dog Act allows a dog registration officer from the local government, with the consent of the owner or occupier, to enter and inspect premises to ascertain whether a dog will be effectively confined on the premises. It is a condition of dog registration that a dog must be effectively confined to the premises in which it is kept.

This sounds reasonable but only if the local government is committed to dogs being bred in suburban areas and not declining to register anyone. Remember, metropolitan residents are already limited to 2 dogs, so number of dogs held is immaterial.

35. Should local governments have the power to enter and inspect premises of a dog breeder, or premises that are subject to a dog breeder application or renewal?
- ☐ Yes
 - ☐ No
 - ☒ Unsure If I bred a litter it would be in my home, same amenities as any human has – no need for any inspection. They don't inspect homes before you can have children.
36. In what situations should a local government be able to enter and inspect premises of a dog breeder of that are subject to a dog breeder application or renewal?
- ☐ Where the dog breeder owns more than a certain number of dogs, or owns a kennel establishment If yes, how many?
 - ☐ No
 - ☒ Unsure

3.8 Conditions – dog breeder registration

Dog breeders registered with the government will be required to comply with particular conditions. This will include legislative requirements relating to information that must

be provided when transferring a dog and the requirement to update a dog's microchip database details with the breeder's dog owner number.

Dog breeders will also be required to comply with the requirements under the Dog Act, Cat Act and Animal Welfare Act and the mandatory dog breeding standards and guidelines when they are introduced under the Animal Welfare Act.

Registered dog breeders will also be required to notify the local government if any details of their dog registration changes.

Questions – All

37. Please specify any additional conditions with which dog breeders should comply:

38. On what grounds do you believe a local government could cancel a dog breeder registration?

- ☒ The dog breeder is convicted of an offence under the Dog Act, Cat Act, Animal Welfare Act, or a dog or cat local law
- ☐ The dog breeder is convicted of an offence under Australian Consumer Law in relation to dogs they have sold or transferred
- ☐ Failing to provide their dog owner number on the microchips of the puppies that they breed
- ☐ Failing to provide their dog owner number when advertising or transferring a dog
- ☒ Other – please specify: Are not points three and four the dog breeder number?

3.9 Exemptions – dog breeder registration

Livestock working dogs

In Queensland, primary producers that own and breed livestock working dogs are exempt from registering as dog breeders where they sell or transfer puppies they have bred to other primary producers.

If a primary producer sells or transfers a puppy they have bred to someone who is not a primary producer, then they are required to register as a dog breeder, and supply their dog breeder registration number.

Questions – All

39. Should primary producers in WA be exempt from registering as dog breeders where they breed and transfer livestock working dogs to other primary producers?

- ☐ Yes
☒ No
☐ Unsure

Please provide reasons for your response: If they sell to pet market they should be registered breeders. Some working dog breeds are significant in the pet market. Are the livestock working dog breeders registered with their own control body?

40. Should primary producers in WA be exempt from registering as dog breeders where they breed and transfer livestock working dogs to any person?

- ☐ Yes
☒ No
☐ Unsure

Please provide reasons for your response: _____

Dog breeders registered with recognised breeding associations

There are dog breeders in WA that are members of non-Government dog breeding organisations and associations.

Dogs West, as an example, is a pedigree breeding association in Western Australia whose members are required to abide by a Code of Ethics.

Following the introduction of the centralised registration system, members of Dogs West will be required to register as a dog breeder with the Government.

Questions – All

41. Should particular dog breeders that are members of particular dog breeding associations be exempt from registering with the Government as dog breeders?

- ☒ Yes
☐ No
☐ Unsure

Please provide reasons for your response: Dogs West members are already highly regulated and have high standards required.

Any other bodies wanting similar exemption should be similarly transparently regulated.

In South Australia, dog breeder registration has recently been introduced.

Members of Dogs SA (the Dogs West equivalent) are not exempt from registering as dog breeders, but Dogs SA are responsible for inputting and maintaining their member's details into the dog breeder register.

The membership number issued by Dogs SA is also used as the Government dog breeder registration number.

42. Should recognised dog breeder associations in WA be responsible for inputting the details of their members into the Government's dog breeder register on the centralised registration system?

- ☒ Yes
☐ No
☐ Unsure

Please provide reasons for your response:

43. What do you perceive to be the benefits of recognised dog breeder associations inputting their members details into the Government's dog breeder register? (You may select more than one option)

- ☐ Creates consistency between registers

Questions – All

- ☒ Avoids duplication for dog breeders who would otherwise need to register with both associations
- ☒ Potentially lessens the administrative burden on local governments
- ☒ Ensures that dog breeders registered with dog breeder associations are also registered with the Government and can be traced on the Government system
- ☐ Other – please specify: _____

44. What obligations should there be on recognised dog breeder associations that input their members details into the Government's dog breeder register? (you may select more than one option)

- ☒ Recognised dog breeder associations must update any change of their member's details within seven days of being notified of the change
- ☐ Recognised dog breeder associations must notify the relevant local government when a dog breeder is no longer a member of their association
- ☐ Recognised dog breeder associations must notify the relevant local government if a member's membership of their association is cancelled by the association
- ☒ Recognised dog breeder associations must notify relevant enforcement agencies where they find evidence that one of their members is not complying with the requirements under the Dog Act, Animal Welfare Act or a relevant dog local law
- ☐ Other – please specify: _____

45. What criteria should be considered when approving a dog breeder association to be a 'recognised' dog breeder association that can input their member's details into the Government's dog breeder register?

- ☒ Privacy and confidentiality policies of the association
- ☒ Compliance with minimum standards for dog breeding, housing, husbandry, transport or sale
- ☐ Other – please specify: _____

46. If you are a member of a dog breeder association, would you like your association to be responsible for completing your Government dog breeder registration?

- ☒ Yes
- ☐ No
- ☐ Unsure

Questions – All

Please provide reasons for your response: Yes this seems reasonable, my Dogs West Membership number should identify me as a breeder.

47. Should the membership number of a member of a recognised dog breeding association be used as their Government dog owner number?

- ☒ Yes
- ☐ No
- ☐ Unsure

Please provide reasons for your response: _____

48. What do you perceive to be the benefits of members of breeding associations using their membership number as their dog owner number?

- ☒ Creates consistency
- ☒ Ensures a dog breeder is easily identifiable in both the association's register and the Government's register
- ☒ Avoids confusion on what number members should quote in advertisements for the sale of dogs
- ☐ Other – please specify: _____

3.10 Transferring a dog

Dog breeders and dog microchip information

Under the new centralised registration system, every owner that registers a dog will be issued with a 'dog owner number' that is unique to the owner. Effectively, every dog owner will have an identification number.

A dog breeder will be required to record their details and their unique 'dog owner number' alongside the microchip details of every puppy bred from their dog/s. This will ensure that the breeder's details are permanently recorded for each dog.

Microchip implanters will be required to provide the following information to the microchip company:

- Information on the dog breeder that owns and bred the dog's mother:
 - Their 'dog owner number'
 - Their name, address and contact details
- If known, information on the dog breeder that owns the dog's fathers:
 - Their 'dog owner number'

- Their name, address and contact details

Microchip database companies will be required to record and retain this information alongside the microchip information of a dog.

Questions – Microchip Implanters and Microchip Database Companies

49. Is it possible to include additional fields of information on your microchip database?

- ☐ Yes
- ☐ No
- ☐ Unsure

50. Will this have an impact on the cost of recording information on the microchip database? If so, how so?

51. Please indicate the name of your microchip database company:

Providing information when transferring a dog

Any person who sells, gives away, transfers or advertises a dog will be required to provide their 'dog owner number' and the dog's microchip number. Both numbers must be provided in any advertisement that advertises dogs or puppies for sale.

This will assist in tracking a dog, and identifying where a dog has come from.

Furthermore, if the person selling, giving away, transferring or advertising a dog alleges to have bred the dog, a consumer can verify if they are a registered breeder on the centralised registration system by searching the 'dog owner number' provided by the breeder.

Consumers will be educated about only sourcing dogs from dog owners that provide their dog owner number and the dog's microchip number. This will help members of the public source dogs and puppies from registered dog breeders that can be identified and held accountable.

If a person has not bred a dog and transfers a dog, they must still provide their dog owner number and the dog's microchip number, to ensure authorities can identify and trace where a dog has been sourced from.

To monitor compliance with this requirement, members of the public will be encouraged to report non-compliant advertisements to an enforcement agency.

Questions – All

52. Are there other ways to monitor or ensure dog advertisements comply with the requirement to provide both the dog owner number and dog's microchip number? Please specify: We use our membership numbers already but they have been fraudulently copied.
53. What agency could be responsible for prosecuting dog owners and breeders that do not comply with the transfer and advertisement requirements?
No idea

Questions – Government and non-Government agencies

54. What is your agency's capacity (considering benefits, issues and costs) to enforce these requirements?

Questions – Consumer Protection WA

Consumer Protection WA is currently responsible for enforcing Australian Consumer Law. If a person advertises a dog for sale and provides a dog owner number and/or dog microchip number that is intentionally incorrect, then they would be making a misleading statement and would be breaching Australian Consumer Law.

55. Would Consumer Protection WA be able to prosecute someone who provided incorrect details when advertising or transferring a dog under Australian Consumer Law?
- ☐ Yes
 - ☐ No
 - ☒ Unsure : Deliberately, repeatedly or once in error?
56. Would there be any issues in enforcing these requirements?
- ☐ Yes
 - ☐ No
 - ☐ Unsure

Please specify any potential issues: _____

Jurisdictional issues

Dog breeders and dog owners outside of WA are not subject to the requirement to have a dog owner number. If they sell, advertise or transfer a dog to a person in WA, they will not be able to comply with the requirement to provide a dog owner number.

If the transaction occurs outside of WA, then the transaction is not subject to WA law and the requirement to provide such details.

If the transaction occurs within WA, then this will be an issue. The Department will continue to identify ways to address this issue.
